

## 1) Check positive number

Flowchart:

Code:

```
public class Checkpositive{
    public static void main(String args[]){
        int num=10;
        if(num>0){
            System.out.print("Number is Positive");
        }else{
            System.out.print("number is not positive");
        }
    }
}
```

## 2) Check negative number

Code:

```
public class negative{
    public static void main(String args[]) {
        int num=10;
        if(num<0){
            System.out.print("Number is negative");
        } else
        {
            System.out.print("number is not negative");
        }
    }
}
```

}  
}

Flowchart:

3) Check Even Odd Number

Flowchart:

Code:

```
public class oddeven{  
    public static void main(String args[]){  
        int num=10;
```

```

        if(num%2==0){
            System.out.print("Number is even");
        }else{
            System.out.print("number is odd");
        }
    }
}

```

#### 4) Area of Square

Flowchart:

Code:

```

public class Area{
    public static void main(String args[]){
        int side=5;
        int area=0;
        area=side*side;
        System.out.println(area);

    }
}

```

#### 5) Area of Rectangle

### Flowchart:

### Code:

```
public class Rectangle{  
    public static void main(String args[]){  
        int length=5;  
        int breadth=3;  
        int area=0;  
        area=length*breadth;  
        System.out.print(area);  
    }  
}
```

### 6) Good Morning

#### Code:

```
public class Goodmorning{  
    public static void main(String args[]){  
        int time=10;  
        if(time>=5 && time<=12){  
            System.out.println("Good Morning");  
        }  
    }  
}
```

Flowchart:

7) Check the largest number

Flowchart:

Code:

```
public class Largest{  
    public static void main(String args[]){  
        int a=10;  
        int b=20;
```

```
int c=110;
if (a>b){
    if(a>c){
        System.out.println("Largest Number" + a);
    }else{
        System.out.println("Largest Number" + c);
    }
} else{
    if(b>c){
        System.out.println("Largest Number" + b);
    }else{
        System.out.println("Largest Number" + c);
    }
}
}
```
